Private fertility assessments

Due to an exponential rise in the demand for GP appointments, we have increased our accessibility by offering private assessments directly onsite;

Male;

£265 – Advanced; semen analysis with post-work up consultation.

£135 – Basic; semen analysis without consultation, results must be interpreted by a medical professional.

Female;

£480 – Advanced; AMH, ultrasound scan, Rubella, Prolactin bloods and BMI

£260 – Basic; AMH, Rubella, Prolactin bloods and BMI

These can also be used by those ineligible for NHS funded investigations.

FERTILITY PRESERVATION

- ★ Oncology patients: Some treatments, such as chemotherapy, radiotherapy or surgery can affect fertility.
- ★ Gender Reassignment: We offer fertility preservation to both trans-female and trans-male people where gametes (sperm or eggs) or embryos will be retrieved and preserved.
- ★ Social sperm freezing: prior to a vasectomy, use of anabolic steroids, prior to cosmetic surgery or to delay conception.
- ★ Social egg freezing; to preserve future fertility / attempt to safeguard against the effects of age-related decline in fertility.

Referral forms

The samples will NOT be processed without a completed and signed request card.

Important Notices
